FACTSHEET : BAGNO 80 - Infrared glass heating panel

Do you like warm bath towels? With the elegant infrared glass heating panel, you not only get a heater but also an elegant and modern design piece at home. Thanks to its **cutting-edge technology,** the unit **distributes the warmth evenly around the room** and there are no temperature differences as with conventional heating units. The units are fitted with overheat prevention and spray water protection, **making them extremely safe.**

Infrared radiators heat up the body and objects, and distribute the warmth evenly around the room without temperature differences. Not only do they aid muscle relaxation and are **beneficial to your health,** they also use less energy – **save up to 50% on your electricity bills!** The glass heating panels are easy to clean and do not take up much space. Their **spray water protection** feature means they can be mounted in bathrooms. An optional **thermostat** can also be fitted.

Technical informations

- Power: 400 Watt
- Supply: 230 Volt
