ECO 1000

INFRARED HEATING PANELS

With our infrared heating walls you will not only get a heating system, but also an **elegant and modern designer piece** in your house. We offer different heat intensities in order to be able to provide different areas of application. Compared to traditional heating methods, our heating walls offer the advantage that **no electromagnetic radiation** is generated, thus a more balanced surface temperature provides **more safety** and an optimal heat distribution.

Thanks to the **splash-proof design**, the units can be installed in bathrooms without any problems.
