300 m³/h

24H TIMER

The VENTUS 310 is ideal for workshops, garages and large rooms. Thanks to the timer and automatic shut-off, the operating time can be adjusted individually. For example, the appliance can switch on automatically early in the morning and heat the room before you even arrive.

This compact space heater features two heat settings, a cool-air fan function and convenient touch controls. For added safety, it is equipped with overheat protection: if the temperature becomes too high, the heater switches off automatically.
