

WHIRLPOOL - SANSIBAR

The whirlpool model is triple insulated and supplied with a 12 cm thermal cover.
The following noise measurements were taken during the operation of the whirlpool system.
Measurements were taken at a distance of 1 m and 5 m from the whirlpool.

Operating Mode	Distance 1 m	Distance 5 m
Full operation (massage pumps) without cover	58.5 dB(A)	50.3 dB(A)
Full operation with closed thermal cover	51.5 dB(A)	48.5 dB(A)
Circulation mode with closed thermal cover	44.5 dB(A)	41.5 dB(A)

Note: The indicated noise levels may vary slightly depending on the installation surface, location, surroundings, and structural conditions.

With thermal cover

Without thermal cover
